

Fork Lift Adapter

PKS's fork lift adapter ramp kit makes it easy to service fork lifts using only a pair of mobile columns. Tool flexibility and accessibility is essential when servicing any type of vehicle. Having a piece of equipment that is as versatile as our mobile lift is one of the most important factors in saving time money and space in a service bay. This ramp easily attaches to the column legs and allows the forklift to drive on to the lifting area. Depending on what type of columns these ramps are used on you would be able to lift a lift truck that weighs up to 60,000 lbs!

Return on Investment Payback Chart

Figure out your ROI

| | | Typical | Your example |
|--|-----------------|---------------------------------|---------------------|
| a) Number of technicians | | 5 | |
| b) Number of minutes saved per day with lifts | | 30 | |
| c) Minutes saved per day | (a × b) | 150 | |
| d) Hours saved per day | (c ÷ 60) | 2.5 | |
| e) Hourly shop rate | | \$80 | |
| f) Additional profit per day | (d × e) | \$200 | |
| g) Number of working days annually | | 260 | |
| h) Equipment cost for 1 set of mobile columns (Set of 4 columns) | | \$30,000 Estimated cost 2009 | |
| i) Days required to recover initial investment | (h ÷ f) | 150 days | |
| j) Additional revenue generated per year after equipment is paid for | (f × g) | \$52,000 | |
